Summary of New Charges:					\$104.74
Total Current Charges:					\$104.74

Charges based on an average residential bill of 800 kWh per month - based on a 30 day billing cycle

The first bill after May 1st will include some April 2010 will include charges at the previous rates. Your consumption will be prorated by day between May and April based on the billing period. These will then disappear and future bills will only include the new charges from May 1st on.

Explanation of Your Charges

- | | |
|--|--|
| <p>Government regulated price for the commodity</p> <p>1 Threshold limit of 600 kWh/day (May 1- Oct 31)
Threshold limit of 1,000 kWh/day (Nov 1 - Apr 30)</p> <p>2 Costs of getting electricity from the
3 generating station to Orillia</p> <p>Orillia Power Distribution charge to cover
4 costs for construction and maintenance of local system.</p> <p>Orillia Power Distribution's monthly
5 charge to cover the fixed cost of maintaining your service (ie, billing, collecting, metering, maintenance)</p> <p>6 Administration fee (staying with your local utility)</p> | <p>Charges by the Independent Electricity
7 System Operator (IESO) to oversee the transmission system</p> <p>8 Costs associated with funding Ministry of Energy and Infrastructure conservation and renewable energy programs</p> <p>9 Payment to reduce the debt of the former Ontario Hydro</p> <p>10 Reduction in debt retirement due to Orillia's own local generation</p> <p>11 Adjusted Usage is used for kWh charges from the IESO or Hydro One. Usage is adjusted for the energy lost in the lines from the customer meter to where Orillia Power Distribution purchases the electricity from the IESO.</p> |
